ENGINEERING GEOLOGY

www.elsevier.com/locate/enggeo

Subject Index Volume 69, 2003

Active fault
Meers fault; Paleoseismology; Seismic hazard; Active folding 193
Active folding
Active fault; Meers fault; Paleoseismology; Seismic hazard 193
Anisotropy
Rock stress measurement; Soft rock; Creep; Heterogeneity 381
Anthropogenic deposits
Artificial ground; Made ground; Derelict ground; Contaminated land; Ground investigation; Superficial deposits 399
Artificial ground
Anthropogenic deposits; Made ground; Derelict ground; Contaminated land; Ground investigation; Superficial deposits 399
Attenuation relationship
Seismic hazard; Deterministic method; Peak ground acceleration; Turkey 127

Berea sandstone
Borehole; Breakouts 219
Borehole
Berea sandstone; Breakouts 219
Borehole logs
Rapakivi; Granite; Fractures; Geophysical; Statistical analysis 171
Breakouts
Borehole; Berea sandstone 219
Buckling
Earthquake; Landslide; Flexural slip; Chi-chi earthquake 1

California
Code of Regulations; Critical buildings; Essential facilities; Earthquake ground motions 415
Cappadocia
Geoenvironment; Geotomography; Rock mass; Tuff; Underground city 245
Cavern
Geological observations; Monitoring; Numerical modelling; Italian Alps 47
Chi-chi earthquake
Earthquake; Landslide; Flexural slip; Buckling 1
Code of Regulations
California; Critical buildings; Essential facilities; Earthquake ground motions 415
Comminution
Loess formation; Silt; Particle size distribution; Fractal; Laboratory experiment 287
Contaminated land
Artificial ground; Anthropogenic deposits; Made ground; Derelict ground; Ground investigation; Superficial deposits 399
Creep
Rock stress measurement; Soft rock; Anisotropy; Heterogeneity 381
Critical buildings
California; Code of Regulations; Essential facilities; Earthquake ground motions 415

Debris flow
Mass movement; Soil slide; Tropical volcanic terrain; Mexico 359
Debris-flow mobilization
Liquefaction; Landslide mechanism; Rainstorm; Ring-shear test; Granular soils 309
DEM
Landslides; Model testing; Parameterization; Topographic 99
Derelict ground
Artificial ground; Anthropogenic deposits; Made ground; Contaminated land; Ground investigation; Superficial deposits 399
Deterministic method
Seismic hazard; Peak ground acceleration; Attenuation relationship; Turkey 127

doi:10.1016/S0013-7952(03)00112-1

Digital model of corrected accumulated flow (DMCF)
Drainage system design; Discharge peak; Geographical Information System (GIS); Rational Method; Runoff 345
Discharge peak
Drainage system design; Digital model of corrected accumulated flow (DMCF); Geographical Information System (GIS); Rational Method; Runoff 345
Displacement of landslide
Rainfall and/or meltwater; Pore-water pressure fluctuation; Prolonged monitoring; Heavy snow district 15
Drainage system design
Discharge peak; Digital model of corrected accumulated flow (DMCF); Geographical Information System (GIS); Rational Method; Runoff 345
Drilling large cores
Fractured rock; Sample recovery 161

Earthquake
Landslide; Flexural slip; Buckling; Chi-chi earthquake 1
Landslide; Hazard zoning; Umbria; Marche 139
Earthquake ground motions
California; Code of Regulations; Critical buildings; Essential facilities 415
Essential facilities
California; Code of Regulations; Critical buildings; Earthquake ground motions 415
Expansive shale
Heave prediction; Triaxial and oedometer swell tests; Lateral restraint; Experimental station 63
Experimental station
Heave prediction; Triaxial and oedometer swell tests; Lateral restraint; Expansive shale 63

Fine-particle content
Landslide; Liquefaction; Laboratory tests; Pore pressure; Grain size 109
Flexural slip
Earthquake; Landslide; Buckling; Chi-chi earthquake 1
Fractal
Loess formation; Silt; Comminution; Particle size distribution; Laboratory experiment 287
Fractured rock
Sample recovery; Drilling large cores 161
Fractures
Rapakivi; Granite; Geophysical; Borehole logs; Statistical analysis 171

Geoenvironment
Cappadocia; Geotomography; Rock mass; Tuff; Underground city 245
Geographical Information System (GIS)
Drainage system design; Discharge peak; Digital model of corrected accumulated flow (DMCF); Rational Method; Runoff 345
Geological observations
Cavern; Monitoring; Numerical modelling; Italian Alps 47
Geologic hazards
Slope stability; Mass movement; Probability; Statistics; Hazard map 331
Geomechanical classification
Rockmass classification; Tectonic stress; In situ stress; Tunnels; Weak rocks 273
Geophysical
Rapakivi; Granite; Fractures; Borehole logs; Statistical analysis 171
Geostatistics
Interpolation; Ordinary kriging; Indicator kriging; Smoothing 37
Geotomography
Cappadocia; Geoenvironment; Rock mass; Tuff; Underground city 245
Grain size
Landslide; Liquefaction; Laboratory tests; Pore pressure; Fine-particle content 109
Grain size distribution
Grid by number; Volumetric sampling; Landslide dam 83
Granite
Rapakivi; Fractures; Geophysical; Borehole logs; Statistical analysis 171
Granular soil
Unsaturated; Tensile strength model; Low water contents 233
Granular soils
Liquefaction; Landslide mechanism; Rainstorm; Ring-shear test; Debris-flow mobilization 309
Grid by number
Grain size distribution; Volumetric sampling; Landslide dam 83
Ground investigation
Artificial ground; Anthropogenic deposits; Made ground; Derelict ground; Contaminated land; Superficial deposits 399

Hazard map
Geologic hazards; Slope stability; Mass movement; Probability; Statistics 331

Hazard zoning
Landslide; Earthquake; Umbria; Marche 139
Heave prediction
Triaxial and oedometer swell tests; Lateral restraint; Experimental station; Expansive shale 63
Heavy snow district
Displacement of landslide; Rainfall and/or meltwater; Pore-water pressure fluctuation; Prolonged monitoring 15
Heterogeneity
Rock stress measurement; Soft rock; Creep; Anisotropy 381
Horizontal drain
Rainfall-induced slope failure; Residual soils; Pore–water pressure; Tensiometer 295

Indicator kriging
Geostatistics; Interpolation; Ordinary kriging; Smoothing 37
In situ stress
Rockmass classification; Geomechanical classification; Tectonic stress; Tunnels; Weak rocks 273
Interpolation
Geostatistics; Ordinary kriging; Indicator kriging; Smoothing 37
Italian Alps
Cavern; Geological observations; Monitoring; Numerical modelling 47

Laboratory experiment
Loess formation; Silt; Comminution; Particle size distribution; Fractal 287
Laboratory tests
Landslide; Liquefaction; Pore pressure; Grain size; Fine-particle content 109
Landslide
Earthquake; Flexural slip; Buckling; Chi-chi earthquake 1
Liquefaction; Laboratory tests; Pore pressure; Grain size; Fine-particle content 109
Earthquake; Hazard zoning; Umbria; Marche 139
Landslide dam
Grain size distribution; Grid by number; Volumetric sampling 83
Landslide mechanism
Liquefaction; Rainstorm; Ring-shear test; Debris-flow mobilization; Granular soils 309
Landslides
Model testing; Parameterization; Topographic; DEM 99
Lateral restraint
Heave prediction; Triaxial and oedometer swell tests; Experimental station; Expansive shale 63
Liquefaction
Landslide; Laboratory tests; Pore pressure; Grain size; Fine-particle content 109
Landslide mechanism; Rainstorm; Ring-shear test; Debris-flow mobilization; Granular soils 309
Loess formation
Silt; Comminution; Particle size distribution; Fractal; Laboratory experiment 287
Low water contents
Unsaturated; Tensile strength model; Granular soil 233

Made ground
Artificial ground; Anthropogenic deposits; Derelict ground; Contaminated land; Ground investigation; Superficial deposits 399
Marche
Landslide; Earthquake; Hazard zoning; Umbria 139
Mass movement
Geologic hazards; Slope stability; Probability; Statistics; Hazard map 331
Soil slide; Debris flow; Tropical volcanic terrain; Mexico 359
Meers fault
Active fault; Paleoseismology; Seismic hazard; Active folding 193
Mexico
Mass movement; Soil slide; Debris flow; Tropical volcanic terrain 359
Model testing
Landslides; Parameterization; Topographic; DEM 99
Monitoring
Cavern; Geological observations; Numerical modelling; Italian Alps 47

Numerical modelling
Cavern; Geological observations; Monitoring; Italian Alps 47

Ordinary kriging
Geostatistics; Interpolation; Indicator kriging; Smoothing 37

Paleoseismology
Active fault; Meers fault; Seismic hazard; Active folding 193
Parameterization
Landslides; Model testing; Topographic; DEM 99

Particle size distribution
Loess formation; Silt; Comminution; Fractal; Laboratory experiment 287
Peak ground acceleration
Seismic hazard; Deterministic method; Attenuation relationship; Turkey 127
Pore pressure
Landslide; Liquefaction; Laboratory tests; Grain size; Fine-particle content 109
Pore–water pressure
Rainfall-induced slope failure; Horizontal drain; Residual soils; Tensiometer 295
Pore-water pressure fluctuation
Displacement of landslide; Rainfall and/or meltwater; Prolonged monitoring; Heavy snow district 15
Probability
Geologic hazards; Slope stability; Mass movement; Statistics; Hazard map 331
Prolonged monitoring
Displacement of landslide; Rainfall and/or meltwater; Pore-water pressure fluctuation; Heavy snow district 15

Rainfall and/or meltwater
Displacement of landslide; Pore-water pressure fluctuation; Prolonged monitoring; Heavy snow district 15
Rainfall-induced slope failure
Horizontal drain; Residual soils; Pore–water pressure; Tensiometer 295
Rainstorm
Liquefaction; Landslide mechanism; Ring-shear test; Debris-flow mobilization; Granular soils 309
Rapakivi
Granite; Fractures; Geophysical; Borehole logs; Statistical analysis 171
Rational Method
Drainage system design; Discharge peak; Digital model of corrected accumulated flow (DMCF); Geographical Information System (GIS); Runoff 345
Residual soils
Rainfall-induced slope failure; Horizontal drain; Pore–water pressure; Tensiometer 295
Ring-shear test
Liquefaction; Landslide mechanism; Rainstorm; Debris-flow mobilization; Granular soils 309
Rock mass
Cappadocia; Geoenvironment; Geotomography; Tuff; Underground city 245
Rockmass classification
Geomechanical classification; Tectonic stress; In situ stress; Tunnels; Weak rocks 273
Rock stress measurement
Soft rock; Creep; Anisotropy; Heterogeneity 381
Runoff
Drainage system design; Discharge peak; Digital model of corrected accumulated flow (DMCF); Geographical Information System (GIS); Rational Method 345

Sample recovery
Fractured rock; Drilling large cores 161
Seismic hazard
Deterministic method; Peak ground acceleration; Attenuation relationship; Turkey 127
Active fault; Meers fault; Paleoseismology; Active folding 193
Silt
Loess formation; Comminution; Particle size distribution; Fractal; Laboratory experiment 287
Slope stability
Geologic hazards; Mass movement; Probability; Statistics; Hazard map 331
Smoothing
Geostatistics; Interpolation; Ordinary kriging; Indicator kriging 37
Soft rock
Rock stress measurement; Creep; Anisotropy; Heterogeneity 381
Soil slide
Mass movement; Debris flow; Tropical volcanic terrain; Mexico 359
Statistical analysis
Rapakivi; Granite; Fractures; Geophysical; Borehole logs 171
Statistics
Geologic hazards; Slope stability; Mass movement; Probability; Hazard map 331
Superficial deposits
Artificial ground; Anthropogenic deposits; Made ground; Derelict ground; Contaminated land; Ground investigation 399

Tectonic stress
Rockmass classification; Geomechanical classification; In situ stress; Tunnels; Weak rocks 273
Tensile strength model
Unsaturated; Low water contents; Granular soil 233
Tensiometer
Rainfall-induced slope failure; Horizontal drain; Residual soils; Pore–water pressure 295
Topographic
Landslides; Model testing; Parameterization; DEM 99

Triaxial and oedometer swell tests
Heave prediction; Lateral restraint; Experimental station; Expansive shale 63
Tropical volcanic terrain
Mass movement; Soil slide; Debris flow; Mexico 359
Tuff
Cappadocia; Geoenvironment; Geotomography; Rock mass; Underground city 245
Tunnels
Rockmass classification; Geomechanical classification; Tectonic stress; In situ stress; Weak rocks 273
Turkey
Seismic hazard; Deterministic method; Peak ground acceleration; Attenuation relationship 127

Umbria
Landslide; Earthquake; Hazard zoning; Marche 139
Underground city
Cappadocia; Geoenvironment; Geotomography; Rock mass; Tuff 245
Unsaturated
Tensile strength model; Low water contents; Granular soil 233

Volumetric sampling
Grain size distribution; Grid by number; Landslide dam 83

Weak rocks
Rockmass classification; Geomechanical classification; Tectonic stress; In situ stress; Tunnels 273
